

# PAPER AND MORE

Special in Reels & Sheets

LENK PAPER

More  
than  
just  
paper

*LENK. This name stands for over 100 years of successful paper production in Germany's Black Forest region.*

*The success story began in 1916, when LENK obtained a patent for the production of crepe paper. Ever since that day, LENK PAPER has pursued a consistent strategy of specialization, developing individualized paper solutions in close liaison with the customer.*

*Thanks to continuous investments in new technologies and markets, LENK PAPER is today one of the leading suppliers of technical speciality papers.*

o

**LENK** – *stands for surfaces*

machine glazed, machine finished, ribbed, creped to 150% extension

**LENK** – *stands for colours*

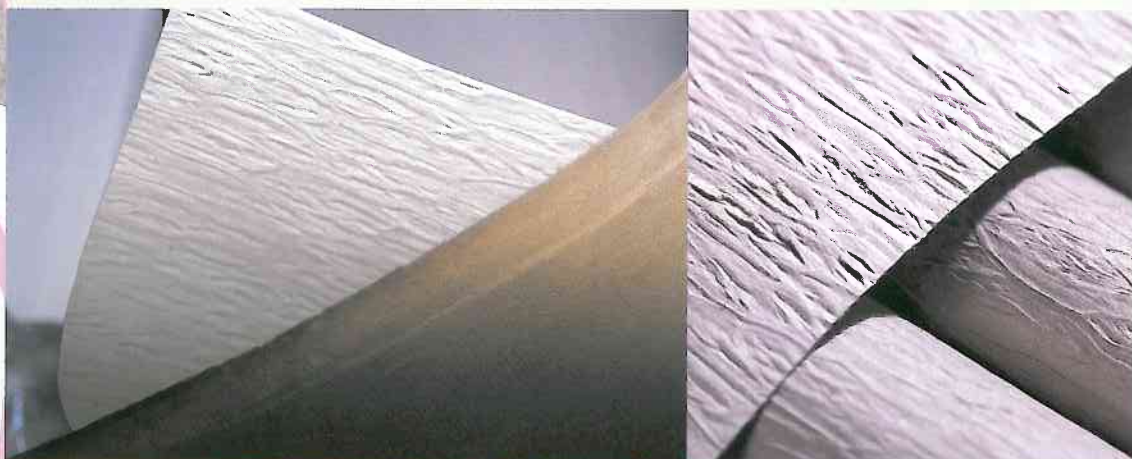

unbleached, bleached, colours from bright yellow to crimson

**LENK** – *stands for reels and formats*

3300 mm jumbo reels to 10 mm small reels / large and small sheet sizes

**LENK** – *stands for specialities*

chlorine-free and acid-free, wet-strength, absorbent and grease-proof papers, absolute paper moisture content adjustable between 3 and 14%

## *Controlled high-quality raw materials*

Our papers owe their high quality to the raw materials we use. High-quality bleached and unbleached pulp from sustainable forest management as well as selected waste paper forms the basis for high-quality papers. All raw materials are subjected to stringent incoming controls and a series of quality tests.

## *Safe production process*

All important technical parameters are controlled both online and offline. We also carry out specific tests requested by the customer. Extensive voluntary tests ensure constant production quality. Our lab, where we examine all parameters in a standard operating environment, is an integral element of this quality strategy.

## *Outgoing goods control*

Our stringent control of outgoing goods means security for your production process.

## *Quality certificates from independent third parties*

We gladly cater to customers' individual requests for specific tests and market requirements. Our standards include the ISEGA Certificate for medical sterile papers and the PTS Certificate, which confirms that our papers are safe for use with foodstuffs.

## *Qualified employees*

Our employees are your guarantee of quality, innovation and flexibility. Through ongoing training and by offering young people apprenticeships in the production, maintenance and commercial sectors, Lenk ensures quality from the very beginning.

## Production / Technology

### PM 2:

Working width: 2100mm  
Basis weight: 55 - 350g / m<sup>2</sup>  
Surfaces: Machine glazed, machine finished, ribbed, light crepe (up to 15% extension)  
Colours: Bleached, unbleached, coloured

### PM 4:

Working width: 3300mm  
Basis weight: 30 - 120g / m<sup>2</sup>  
Surfaces: Machine glazed  
Colours: Bleached, unbleached, coloured

### Crepe machine:

Working width: 1550mm  
Basis weight: 45 - 250g / m<sup>2</sup>  
Extension: 20 - 150% (extensible crepe)

*Conditioning unit:* Absolute moisture content: 3-14%

## Equipment

### Rereeler:

Reels  
Widths: 10mm - 3300mm  
Diameter: 80mm - 1500mm  
Inside core diameter:  
20, 30, 50, 70, 76, 100, 110,  
120, 130, 152mm

### Sheeter:

Formats  
Width: min. 380mm - max. 1600mm  
Length: min. 380mm - max. 1750mm

### Guillotine:

Formats  
Width: min. 50mm - max. 1200mm  
Length: min. 50mm - max. 1250mm

## Packaging / Transport

*Type of packaging:* Environmentally compatible, protection as specified by customer

*Pallets:* Oneway and returnable pallets, export pallets (Inka, Sirex)

*Formats:* Unreamed, reamed, special packagings on request

*Reels:* Horizontal, vertical, with/without pallets

*Loading:* E.g. Joloda System

# *Innovative customized solutions*

We will develop your new paper in close liaison with you and our partners.

Your proprietary formula will be created from a variety of different raw materials. This is the basis for producing a paper that is geared to your specific purposes and requirements.

**This is the guarantee of your success and sets us apart from our competitors**

## *Product range*
